

Design, build and Launch of a Re-entry CubeSat

Function:

Event Manager

One open vacancy

Aether's project

The Aether Student CubeSat team brings together young Belgian engineers who are passionate about space technology. We are designing a CubeSat: a nano-satellite small enough to hold in your hand. In the past decade, the CubeSat standard has enabled countless new innovations in the space industry, and we are determined to uphold this tradition! Aether is focusing on the area of re-entry: creating the technology that will allow future CubeSats to safely re-enter the atmosphere and land on Earth after carrying out their experiments in orbit. This will allow scientists to analyze samples and get even more results out of their experiments, and all this with the affordability and accessibility that come with the CubeSat platform!

Function description

The event manager is responsible for planning, coordinating and executing events, as well as organizing new events. Our biggest event is Engineering in Space, in which the event manager is responsible for the communication with Groep T and other associates. Other events include design reviews, Space Tech Expo Bremen, alumni drinks, etc. This role involves strategic planning, logistical coordination and fostering collaboration among the team and external partners.

What do you gain?

- 🔗 A unique experience within an exciting space mission.
- 🔗 Create added value for your CV and the team.
- 🔗 Improve your (soft) skills on many aspects.
- 🔗 Be part of the team that will revolutionize the CubeSat platform.
- 🔗 Connection to a wide network of aerospace companies.

Profile

- 🔗 Minimum bachelor's degree.
- 🔗 Excellent communication skills.
- 🔗 Ability to multitask.
- 🔗 Ability to work in stressful situations.

Bonus

- 🔗 Experience with event planning.
